

Devil's Claw

Devil's Claw is well researched and herbalists use it extensively as an anti-inflammatory, an analgesic and as a digestive stimulant. Research suggests that its positive actions are due to a natural compound called harpagoside, which reduces inflammation in the joints. In fact, these analgesic and anti-inflammatory properties make Devil's Claw ideal for sufferers from uncomfortable joints and inflammation. This high strength Devil's Claw contains 924mg of ground Devil's Claw root, which provides you with 6.6mg of harpagosides.

Benefits:

- Helps to alleviate joint, ligament and tendon problems and assists in the improvement of joints.
- May help joint flexibility.
